Hi Kim,

This brings up a question I wanted to ask you today and I haven't. I see some people have requested access to the site. These include various managers like Mardi Klevs and Tammy Moore. You are okay with me granting them access, right?

Thank you,  
Jenny

Hi David,

Yaay, so glad to hear that you'll be promoting the site. The easiest way for me to grant access is if you share the link or folks go directly to the site and request access. For those wanting access to the Wolverine page, they would need to contact either myself or Jennifer Wilson for access. Good luck with the talk. 😊

Take care,  
Kim

Kim,

I have been requested to provide a talk to my section about PFASs issues. I will be referring them to you for technical expertise. Regarding access to the sharepoint site, is it better for them to request access through an email to you or is it easier when I attempt to share the site through which you get a notification? I am not sure how many will want access, but many other RPMs may approach me in the near future and I wasn't sure what is the most efficient method for them to get access to the site.

For RPMs with Michigan sites, will they have access to the Wolverine information or will they have to request special permission beyond the general PFAS site?

David P. Seely
